

Federal regulations require colleges to disclose information regarding their occupational programs that require state licensure to be employed and the status of the program for meeting an individual state’s licensure requirements. To determine if a program meets state licensure requirements, locate the program of choice, and view the status that program has for the state you are located. If the state you are located in does not appear in the meets program licensure requirements field, then we cannot guarantee the program of study will be able to lead you to a state occupational licensure in your state.

Program Leading to Licensure	States in which the Program meets Licensure Requirements	States in which the Program does NOT meet Licensure Requirements	States in which it has not been determined if the Program meets Licensure Requirements	Notes and Additional Links
Advanced Emergency Medical Technician (EMH1)	Georgia , Alabama , South Carolina	Florida, Tennessee	Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico,	*Not all states have this level of licensure. Students should check with their state EMS agency to ensure this level is available in their home state. Reciprocity can be achieved within Tennessee.
